

WHAT IS CLAIMED IS:

1. A method for producing an electronic part having a plurality of internal electrodes, said method comprising:

5 laminating a plurality of ceramic green sheets one on top of the other, at least some of the ceramic green sheets having conductive paste on a surface thereof such that the conductive paste is located between two adjacent ceramic green sheets,

10 baking the laminated product to obtain the electronic part, the contraction ratio of the ceramic material forming the ceramic green sheets being greater than the contraction ratio of the conductive paste.
